	Native Lands cannot be sold.	Crown Lands are not sold.		...	...	...	214,040,000 Acres.

## Remarks :—

Land tenure in the Northern Provinces of Nigeria is governed by the Land and Native Rights Ordinance (Chapter 85) under which Rights of Occupancy may be granted by the Governor.

The area of a building site is usually limited to 2 acres in a township; building sites of over 5 acres are not granted without the sanction of the Secretary of State.

Agricultural Rights of Occupancy may not exceed 1,200 acres in extent; and Rights of Occupancy for grazing may not exceed 12,500 acres in extent. The agricultural Rights of Occupancy granted hitherto have not exceeded about 20 acres.

Rights of Occupancy may be granted for any period up to 99 years. The use to which the site is to be put and the amount which the applicant proposes to spend in improvements are taken into consideration when fixing the term.

Frequently sites are acquired at auctions, the rent being fixed and the bidding being on the premium. Rents are revised at periods not exceeding 7 years.

Rights of Occupancy cannot be alienated in any way without the consent of the Governor.

**SOUTHERN PROVINCES :—***The Crown Lands Ordinance (Chapter 84)* provides that, subject to the Regulations thereunder, the Governor may grant leases of Crown land for any term, or in the case of a lease to a native of Nigeria for an indefinite term, and may grant licences for the temporary occupation of Crown lands, but except with the consent of the Secretary of State first obtained the Governor shall not sell any Crown lands.

Crown land is of limited extent. Outside the Colony it consists of lands purchased by the Government for public purposes, such as those required for the Eastern Division of the Railway, and those lands covered by the Treaties made by the Royal Niger Company with Native Rulers in Southern Nigeria, and which are vested in the Government by the Niger Lands Transfer Ordinance (Chapter 86).

*The Native Lands Acquisition Ordinance (Chapter 89)* provides that no alien shall acquire any interest in or over any lands within the Protectorate from a native except under an instrument which has received the approval in writing of the Governor, and that any instrument which has not received the approval of the Governor shall be null and void. It is further provided that it shall be unlawful for any alien to occupy land belonging to a native except under an instrument approved by the Governor, unless such land was occupied prior to the enactment of restrictive legislation, or is authorised by any Ordinance.

\* It is not possible to give the number of acres under cultivation or the total of any crops. The most important crops in the north are guinea-corn, various species of millets, cotton and ground-nuts and in the south yams, maize, cocoa, cotton, cassava. The trees yielding such products as palm oil and kernels, shea nuts, etc., receive little or no cultivation. Except possibly in the case of cocoa the quantities exported give little indication of the total production.

Fishing is carried on in all the rivers, most of the fish caught being used for immediate local consumption, but small quantities are cured and traded with the towns distant from the river, where this form of food is highly prized. The curing is a very crude process, the fish not being dried, but placed in a grass fire which burns quickly and with great heat, converting the scales of the fish into a protective cinder.

## 7.—SUMMARY of INDUSTRIAL DEVELOPMENT.

7. A summarised statement of any developments in the agricultural, forestal, fishing, mining, and other industries of the Colony during the year under review, with a statement as to progress up to date. A special account should be given of Government grants or other action for the development of the natural resources and industries of the Colony.

The export of cocoa in the early part of the year (1922 crop) showed a further increase as compared to previous years, in spite of a rather lower price. The crop of 1923, is apparently normal in quantity but the export of this crop, of which a considerable part would normally be shipped during the last few weeks of the year is being delayed owing to a fall in the price. The season was very favourable for all crops in the North, and the export of this crop in 1923-24 promises to be large. The export for the calendar year 1923 is, however, considerably affected by the small export of the early part of the year, when the 1922 crop was being exported. The southern (indigenous) cotton crop of 1922, which was marketed in 1923 at a slightly higher price than last year, yielded a correspondingly slightly greater export, the total quantity exported representing but a small fraction of the total production. The 1922 American cotton crop, in the Northern Provinces, again provided an increased export in 1923. The acreage of this cotton in the 1923 crop, which has matured a little earlier than usual, so that marketing has begun in December, is believed to be much greater than in any previous year. The cultivation of this cotton was initiated by Government and has increased every year. The quality of the cotton, which has been good from the beginning, is also steadily improving. This is due, partly to the annual distribution at Government expense of large quantities (nearly 1,900 tons in 1922-23) of pure seed, selected by Government inspectors, but given free by the British Cotton Growing Association, and partly to the official grading of all seed cotton purchased for export. The export of both palm oil and kernels, at roughly the same or very slightly better level of prices on the whole, was greater than last year. The export duties on palm products and groundnuts were reduced in November.

(a) Agriculture ... ..	...	...	...
PREDIAL:—			
Two headings of predial labour.			
(a) Every village farm belongs to an individual or to a family, and is worked for the benefit of the owner or owners. Cultivation by village communistic system is very rare. Wherever it exists, the farmers in the village combine to clear the ground or reap the crops of the farms of each other in rotation. Food and drink for those at work during the period—which does not exceed one or two days for each farm—are provided by the owner or owners of the farm.
